The Breezair Supercool EXS Series: now available with the new advanced touch screen MagIQtouch Controller

Breezair Supercool EXS 220 provides an incredible 15% more cooling capacity than the standard Breezair Icon (EXH/EXQ) range!

Permatuff™ corrosion proof cabinet
The Breezair cabinet will not corrode or rust. The cast aluminium cabinet is powder coated in a salt resistant finish. It is also treated with a special anti-rust primer, and has a built-in sacrificial anode. Plus, it's designed to last with any primary 2 colour system grey and beige.

MagIQtouch™ BMS Control (optional)
Our control is BMS compatible. Please contact your local representative for further options.

Advanced touch screen MagIQtouch™ Controller
The technology includes a built-in real-time clock, making the operating process simple. You can view time, temperature, water level, and more. It's also available in a maximum length of 40 cm (optional), and is compatible up to 100 control fans (single MagIQtouch Controller, using optional Life Module and water level - 100 special capacities required). *Fan length must be <= 1000 mm.

AUTOWaterseal
The AUTOWaterseal allows the cooler to discharge water automatically, without the need for manual intervention. It features a built-in pump and sump, which can be set to discharge water into a drain, or into a sump. The sump is completely self-contained, and can be used to collect water for use in the building. The sump is completely self-contained and can be used to collect water for use in the building.

WATERManager™ system
The WATERManager™ system allows you to monitor the water level in the sump, and to set the pump to discharge water into a drain, or into a sump. The sump is completely self-contained, and can be used to collect water for use in the building. The sump is completely self-contained and can be used to collect water for use in the building.

Clean and dry function
The cooler dries automatically after each cycle, ensuring that the sump is completely dry. This prevents the growth of mould and mildew, which can cause odours and health problems. The cooler dries automatically after each cycle, ensuring that the sump is completely dry. This prevents the growth of mould and mildew, which can cause odours and health problems.

Digital Smartbox™ control power module
A state-of-the-art digital electronic control module allows you to monitor the water level in the sump, and to set the pump to discharge water into a drain, or into a sump. The sump is completely self-contained, and can be used to collect water for use in the building. The sump is completely self-contained and can be used to collect water for use in the building.

HubPower™ direct drive (ECM) motor
The HubPower™ direct drive (ECM) motor is a highly efficient and durable motor, which is designed to last for many years. It is compatible with any primary 2 colour system grey and beige.

Non-clogging water distribution system
The non-clogging water distribution system ensures that the water is distributed evenly across the cooling surface. This prevents the growth of mould and mildew, which can cause odours and health problems. The non-clogging water distribution system ensures that the water is distributed evenly across the cooling surface. This prevents the growth of mould and mildew, which can cause odours and health problems.

Tornado® water pump
The Tornado® water pump is a highly efficient and durable pump, which is designed to last for many years. It is compatible with any primary 2 colour system grey and beige.

To change the tank drain delay use the following sequence 1.With the wall control turned OFF, hold

down the button. While holding down this button press the button. The current setting and 3 central fan speed bars will be displayed. 2. Press the or button to scroll through the available settings. 3. When the desired setting is displayed, press the button to store the new setting. CHANGING THE DEFAULT PARAMETER SETTINGS SALINITY CONTROL METHOD SELECTOR The following operating parameters can be adjusted using the wall control but only if a drain valve has been fitted to your cooler. This parameter controls the following 2 options. Value 0 uses the intelligent WaterManager which measures and controls the water's salinity level. Value 1 drains the tank every 65 minutes when the cooler is ON. Value 0 is the preset and preferred setting. To change the salinity control setting use the following sequence 1. With the wall control turned OFF, hold down the button. Continue to hold this button down and press the button. If fitted, the bleed system, pictured on page 16, will constantly drain small amounts of water during the operation of the cooler. This allows fresh water to be added diluting any minerals and salts accumulated. The bleed rate for your cooler will depend on local operating conditions and will be set by the installer. If your cooler has been installed with a drain valve it is accompanied by the WaterManager salinity probes. When the tank's water salinity level reaches a preset level the WaterManager will open the drain valve and release about 6 to 8 litres. Fresh water will then be added diluting any minerals or salts accumulated. The Water Manager will continue to monitor and drain water as required. This can be set by changing the salinity control method selector if using the wall control, or DIP switch F if using the remote control.

<https://www.hotel-forsthaus.com/images/9300-usbs-manual.pdf>

NOTE When the cooler's tank is empty and the cooler is turned on again, the fan operation will be delayed as the tank is refilled and the pads are saturated. If the power in your home goes off for less than 5 seconds the cooler will retain its current settings. That is, it will stop for the time the power is off but resume operation when the power comes back on again. If the power goes off for more than 5 seconds the cooler will automatically turn itself off. That is, once the power comes back on the cooler will not resume operation. You will have to turn the cooler back on using the wall control or remote control. U kunt hieronder aangeven waarom deze vraag ongepast is. Wij controleren de vraag en zonodig wordt deze verwijderd. Read more Ok. As the name indicates, it gives you a feel of sea breeze at the beach. These ac combines a hush power motor with a super quiet centrifugal fan. Breezair air conditioners save up to 90 percent electricity than refrigerated units and save up to 40 percent electricity than conventional ducted evaporative systems without an inverter technology. Therefore, its running cost is cut down approximately to less than half that of a traditional system. Breezair offers a wide range of air conditioner colors, shapes and sizes. Its icon series is perfectly suitable for residential and commercial use. Our friendly experts at WeatherWorld, can guide you to choose a perfect air conditioning system within your budget and space around Melbourne. Breezair ion series hold a unique centrifugal fan which offers high pressure performance with low noise. These ac monitors water quality to reduce consumption, wastage and unnecessary dumping of water. Our licensed and qualified technicians team will ensure that the system maximize your comfort and minimize the running costs. WeatherWorld is providing lucrative Breezair air conditioner prices in Melbourne. WetherWorld provide you best Breezair ac and cooler prices, supply and installation with 7 years manufacturing warranty.

We are available Melbourne wide and come to you 7 days a week. Contact best Breezair dealers in Melbourne today for more information. Just a couple more details to help us give you your FREE quotes! Tom came out and gave us a competitive quote on a new braemar, he said weatherworld was a family owned business in the industry for over 30 years. Everything Tom said would happen, did happen. The installation went very well and we definitely recommend weatherworld to others. The sales manager Ron is very helpful person and found me a good quote. My split system was quoted at a reasonable price due to the extension pipes and double storey installation. The work was done after the Christmas break with 3 people electrician and installers for a Mitsubishi Electric split system. They came at 9.00 am and finished the work at 1.00pm. Relatively fast and efficient. Tom came out and gave us a competitive quote on a new braemar, he said weatherworld was a family owned business in the industry for over 30 years.
